DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species in figures 1-3; Species in figures 4 5; Species in figures 6 and 7; Species in figures 8 and 9; and Species in figure 10.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 28 and 43 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 3731

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

2. During a telephone conversation with John Kappos on 12/9/03 a provisional election was made with traverse to prosecute the invention of Species in figures 1-3, claims 28-32, 39, 42-45, and 47. Affirmation of this election must be made by applicant in replying to this Office action. Claims 33-38, 40, 41, and 46 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 28-32, 39, 42-45, and 47 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3-5, 12, 16, 20, 22, 25, and 27 of U.S. Patent No. 6,102,931. Although the conflicting claims are not identical, they are not patentably distinct from each other because the relatively broad

Art Unit: 3731

“subject matter claimed in the instant application clearly would have been obvious in view of the relatively detailed subject matter of the patent claims.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 28-30, 32, 39, 42-45, and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Yock (U.S. 5,501,227).

Yock discloses substantially as claimed in figures 8 and 9, an a catheter (or cannula) (26b) having an inflatable member (33b); a first lumen (31c) disposed within said catheter (26b) having an inflation port to inflate the inflatable member (33b); wherein said first lumen (31c) connected the interior of said inflatable member (33b); a second lumen (51) disposed within said catheter (26b) having an exhaust port for expulsion of gas from the interior of said inflatable member (33b) (See Col. 6, lines 37-43); a non-mechanically actuated valve (52) positioned across the second lumen (51) (See Col. 7, lines 1-33) to prevent the expulsion of liquid from the interior of the balloon (33b) through said exhaust port.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3731

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

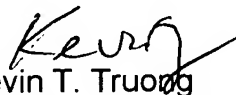

5. Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yock (U.S. 5,501,227).

Yock discloses the claimed invention except for wherein the valve is manufactured from slitted rubber. It would have been obvious to one skilled in the art at time the invention was made to make the Yock's valve formed of slitted rubber instead of plastic, since applicant has not disclosed that valve manufactured from slitted rubber provides any criticality and/or unexpected results and it appears that the invention would perform equally well with valve formed of plastic.
